Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 332853 to Schuttler.

The Shuttler reference discloses a metallic tubular hose having a plurality of corrugations or bellows (5) and a jacket (12) of at least one outer layer, with the hose body having a longitudinal edge at one end. An insert pipe (3) extending longitudinally into the hose body and a metallic sleeve (16) compressing the jacket against the insert at a plurality of pressure points (16 and 14) disposed axially along the longitudinal edge of the hose body from one end with the bellow tube having a restricted end portion (10) at one end thereof located forward of the last pressure point (16), as recited in claim 1. The restricted end portion lies at a location between the pressure point (14) closest to the longitudinal edge of the hose body and the last pressure point (16), as recited in claim 2.

Allowable Subject Matter

2. Claims 3-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Fournier et al., Wilson, Furtua et al., Furuta, Guarnaschelli, Bessette, and Lalikos et al. are all pertinent to Applicant's invention in disclosing corrugated hoses having connection ends provided thereon.
